

Everything from one source

With many years of experience as well as reliable cooperation with our cooperation partners at home and abroad, we successfully supply used and reconditioned inventory for hospitals and medical equipment exclusively as complete solutions to our international clientele. Our track record includes the sale of used inventory, furnishings and medical equipment required to equip complete hospitals.

Our global customer base in South America, Central America, Africa, Middle East and Asia has been able to supply complete hospitals up to 120 beds for the general provision of different departments with pre-owned inventory and equipment.

In addition to brand new medical devices and technology, we have a large network of partners and can also offer medical equipment / medical facilities from site closures. The reasons for such site closures may be the cessation of business, outsourcing or even bankruptcies.

Low Cost Solution with pre owned Equipment up to 15 % from New Price

Used medical devices, laboratory technology and hospital inventory still possess a high-quality capacity as a resource, thanks to the lower cost in their acquisition.

Used medical devices, laboratory technology and hospital inventory are not obsolete. They are still of a high quality and ready for use following technical checking. In this way, you can achieve an excellent cost-benefit ratio, and obtain inexpensive, high-quality medical devices.

HOSPITAL TRADE as a SAICON UG company was born out of an idea to provide aid and support in crisis areas and to build up the infrastructure of underdeveloped countries. Since its foundation in 2017, the demand for medical products and hospitals has been growing steadily. With our cooperation partners, we are successfully active worldwide in the international sale of used inventory, object furnishings, medical equipment and transport vehicles and thus make our contribution in times of crisis.

With our many years of experience and reliable collaboration with our cooperation partners at home and abroad, we successfully supply used and refurbished inventory for hospitals and medical equipment exclusively as complete solutions to our international clientele.
